

META-SWITCH™

 WEIGHT MANAGEMENT SYSTEM

CURB™

 OAT CRANBERRY SNACK BAR

Purpose

Curb™ Bars aid in the purpose of weight management by supporting the gastrointestinal system by acting as a pre-biotic and cleanser. Curb Bar mimics nature's mix of soluble to insoluble fiber to better grant the many health benefits that can only come from both types of fiber. Insoluble fiber promotes regularity and digestive health, while soluble fiber supports healthy blood sugar and cholesterol levels, slows digestion, and provides feelings of "fullness" to aid in diet control and weight management.

General Description

The Need for Fiber

Not only is fiber needed for healthy weight loss, but it is also an essential part of our daily diet. However, with today's fast-paced life style, getting the right type and amounts of fiber is becoming increasingly difficult. The American Dietetic Associates (ADA)¹ recommends 25 grams of fiber a day for adult women and 38 grams a day for adult men. As a food, fiber has been shown to:

- Support and promote regularity and digestive health.
- Support and promote healthy blood sugar levels.
- Support and promote healthy cholesterol levels.
- Support and promote the body's metabolism.
- Reduce feelings of hunger and food cravings.
- Act as a prebiotic to increase production of satiety hormones, increase levels of healthy bacteria, and stimulate immune function.

Fiber is one of the most effective ways to keep your heart, liver, and digestive system clean, healthy, and working optimally.

Soluble and Insoluble Fiber

There are two types of fiber. They are both important to our health and well-being.

Soluble fiber is like a sponge. It absorbs water and helps trap fats, sugars, and cholesterol. Soluble fiber also slows down the rate of digestion of the foods consumed.

Insoluble fiber is like a broom. Rather than absorbing liquid and food components, it quickly moves through your system and helps clean the intestines. It helps prevent occasional constipation, helps move food, and speeds up the removal of toxins.

By virtue of the dynamic relationship between these two forms of fiber, and the myriad of health benefits derived from fiber, it's no wonder that nature provides a balanced ratio of these two fibers.

Unfortunately, most of the fiber products out there don't have the right ratio, or they are comprised of all soluble fiber. Additionally, they are either high in sugars, or they taste like cardboard. Until now, there has not been an ideal solution between taste, convenience, and the right content to provide your ideal ratio of fiber.

Curb is Optimal Fiber

Max's Curb Bar is arguably the world's first snack bar that mimics nature by providing an ideal ratio of insoluble to soluble fiber that helps curb unwanted cravings and reduce appetite. Unlike other fiber supplements, Curb's unique combination of fiber reduces the amount of bloating that can occur. The ratio of 12 grams of fiber to 120 calories satisfies cravings as a viable alternative to snack foods with a lower calorie count.

Although Curb can be eaten on its own, it is designed to be an integral part of Max International's Meta-Switch™ Weight Management System. Eating Curb Bars as a snack alternative and taking the Switch™ capsules 30 minutes before every meal promotes a healthy metabolism while providing feelings of fullness and reducing food cravings.

Product Benefits

- Curb is the only known fiber bar that provides an ideal ratio of soluble to insoluble fiber.*
- Provides 12 grams of fiber at 120 calories, the best fiber-to-calorie ratio currently on the market.*
- Contains all-natural ingredients with no artificial sweeteners to keep your body free of preservatives.*
- Uses glucose rather than fructose as a sweetener to aid in feelings of fullness.*
- A unique flavor profile that tastes as good as or better than any other fiber bar on the market.*

Ingredients

Curb Bar uses a variety of all-natural ingredients to provide the optimal level of insoluble to soluble fiber at the fewest possible calories with no artificial flavors or preservatives.

Corn bran, inulin, glucose, rolled oat, water, dried cranberry (cranberry, apple juice concentrate), yellow split peas, flax seed, evaporated cane juice (evaporated cane juice, water), date paste, dried blueberry (blueberry, apple juice concentrate, sunflower oil), desiccated coconut, sunflower seed, rice dextrin, grape juice concentrate, chia, sunflower oil, natural flavor, pectin.

Produced in a factory that processes egg, may contain traces of egg.

Ingredients: Corn bran, inulin, glucose, rolled oat, water, dried cranberry (cranberry, apple juice concentrate), yellow split peas, flax seed, evaporated cane juice (evaporated cane juice, water), date paste, dried blueberry (blueberry, apple juice concentrate, sunower oil), desiccated coconut, sunower seed, rice dextrin, grape juice concentrate, chia, sunower oil, natural avor, pectin. May contain egg.

Banned Substance Control Group Certified

Curb has received the highly coveted Banned Substance Control Group certification proving that Curb contains no trace of harmful anabolic agents or stimulants. Under the direction of anti-doping expert Don Catlin, M.D., professionals with years of experience use cutting-edge technology and vigorous testing methodology to test every submitted product. BSCG certification affirms this product is safe for elite and professional athletes everywhere.

FAQs

How many bars can I eat in a day?

Because of the high fiber content of each Curb™ Bar, we recommend eating a half of a bar between meals for a total of one per day. As your fiber intake increases and your system adjusts, you can eat an entire bar for one snack between meals.

I already take fiber supplements, should I eat Curb bars?

While Curb Bars can be taken with your other fiber supplements, we recommend that you research the amount of soluble and insoluble fiber contained in these other supplements. Curb is designed to provide the ideal ratio of insoluble to soluble fiber as nature intended. If those other products are only soluble or insoluble fiber, then your balance of fiber will be skewed. Use Curb as your primary source of fiber apart from the food you eat and use lower amounts of other supplements to keep your fiber intake in balance.

Will I feel bloated and gassy after eating a bar?

Some feelings of bloat are normal for high-fiber diets. Water is the key activator for fiber to do its job. Drinking plenty of water before and after eating a bar (16 -20 oz / 480-600 mL) will reduce the possibility of these sensations. Your body may also not be used to a high-fiber diet, in which case we recommend eating only a half a bar a day until your body adjusts to the higher fiber intake.

What if I have food allergies, is Curb safe for me?

All Curb Bars are gluten free, dairy free, soy free, and peanut free. Curb is also free of artificial sweeteners. Because Curb is manufactured in a facility that handles egg products, bars may contain traces of egg.

Does Meta-Switch work with weight loss programs?

Meta-Switch is designed to be flexible enough to work with any weight management program.

Can I only take the Switch Supplement for the program; do I need to take the Curb Fiber Bar?

Curb and Switch are designed to work together in order to assist your metabolism and lower your appetite. Curb plays an essential role in the Meta-Switch program by reducing food cravings while providing you with a fiber supplement.

Can I lose all the weight I want just by taking the Meta-Switch products?

While you can lose some weight while only taking Switch and Curb, the most effective means of weight management involves portion control, healthier diet, and increased exercise. What you choose to engage in depends on how much weight you wish to lose. See the Meta-Switch product page on max.com for more information on the different life-style "switches" you can make to maximize your weight management.

CURB™

OAT CRANBERRY SNACK BAR

Curb Bar Weighs in Against the Competition

There are many snack bars on the market, but only ONE has a blend of insoluble and soluble fiber that mimics natural fruits and vegetables.

At 120 calories for a total of 12 grams of fiber, Curb also has the best ratio of caloric intake to fiber intake on the market. No other snack offers so much fiber for so few calories.

Curb bar is also low in sodium and contains all-natural glucose as a sweetener.

When you're looking for the best possible fiber intake with the lowest amount of calories and additives, then there is no comparison – Curb stands alone.
